DESIGN PRINCIPLES

Photography First	Location-Aware	Warm vs. Cool	Generous Space	Content First
Imagery leads, UI recedes. Full-bleed heroes, minimal overlays.	Nav adapts color and content per studio. Visitors always know where they are.	Taylor's Mill = earthy gold; Powdersville = slate blue. Never mix them.	Let the work breathe. Padding over packing. Whitespace is intentional.	No gratuitous animations. Subtle transitions only where they aid comprehension.
